(the tracks were apparently washed out from that point on). They were not by the local heads of labor unions, and by flowery speeches of valcome from local officials. High hopes in the area died abruptly however as it became quickly obvious to all that the rescue organization lacked the equipment, the brains or the know-how to administer the desperately needed relief. The inshift of communist health authorities to control or check the outbreak of tryhoid, cholera and dysentery added impeture to the mounting wave of auti-government reaction; the reshuffle of scientific personnel is bolieved to have been designed as the only possible countermeasure for the prevention of defections and the organization of anti-government underground units.
